The 4th Industrial Revolution or Industry 4.0 is a global trend in the Manufacturing Industry, marked by the existence between Man-Machine-Time with real connectivity.

Industry 4.0 can be a game changer for Indonesia’s economic growth. The direct influence of Industry 4.0 is a strong impetus to revitalize the manufacturing industry sector with the main goal of regaining Indonesia’s position as a net exporter. This will also encourage an increase in the need for investment and labor quality.

The Indonesian Textile & Clothing Industry in the Industry 4.0 era is directed to become the world’s top five manufacturing industry and to become the leader in the functional clothing sector. The biggest opportunity comes in the growth of consumption in ASEAN countries and the increasing need for functional clothing in the domestic market.

Therefore, smart and accurate investment is a necessity for people in the textile & clothing business. Business excellence can then be enhanced in order to welcome and take advantage of all the opportunities that exist in realizing the goal of Making Indonesia 4.0.

**Key Market Trends**

**Accelerating Exports Growth to Drive the Market**

- Indonesia is among the top 10 textile-producing nations in the world.
- The country is also the 12th largest textile and apparel exporter, with major exporting destinations, including the United States, the European Union, and the Middle East.
- The country’s exports were relatively stagnant during the four year period of 2012-2016. The biggest increase in exports was witnessed in the yarn and garments segments, during 2016-2018.
- According to API, in 2017, the country faced declines in exports in Japan and the European Union, which were offset by rising textile demand in Southeast Asia and the Middle East.
- According to the Indonesian Textile Association (API), despite the global decline in textile demand, the overall textile exports of the country rose by 8% on YoY basis, in 2018.
- the United States continued to be the top market destination for Indonesian textiles.

**Indonesia an Endless Opportunities:**

The government has deeply plan to continue Machinery Restructuring Program 2020, it’s renowned as Technology Improvement Program in national textile and textile products industry sector which has been running for more than 5 years to serve as technology enhancement considering its significant contribution to the country’s revenue from textile and textile products, increased employment and as a main driver in supplying domestic market needs.

"The national TPT industry is being encouraged to immediately utilize digital technologies such as 3D printing, automation, and the internet of things so that they are ready to face the era of Industry 4.0. This transformation effort is believed to be able to increase efficiency and productivity, in addition to continuing the machine and equipment restructuring program”.

Airiangga Hartanto
Indonesia Ministry of Industry

**Indo Intertex has committed to support this program and confident to be the best destination for your company to contribute significantly to the technological improvement and business growth of the national textile and textile products industry.**
Who Should Contribute

- Machinery for Winding, Texturising, Twisting and Accessories
- Machinery for Bonding, Finishing, Felting and Accessories
- Machinery for Preparatory Weaving, Weaving, Tufting and Accessories
- Machinery for Preparatory Spinning, Yarn Spinning, Fibre Spinning and Accessories
- Machinery for Knitting, Warp Knitting, Hosiery and Accessories
- Spareparts for Textile, Accessories, Non-Woven Machinery & Accessories
- Machinery for Washing, Bleaching, Dyeing, Cleaning, Cutting, Folding and Accessories
- Machinery for Embroidery, Carding, Slitting, Braiding and Accessories
- Machinery for Garmenting, Garment Processing & Finishing and Accessories
- Machinery for Pressing, Fixing, Ironing, Laundry, Packaging
- Machinery for Laser Cutting, Marking System/Beams, Leather & Accessories
- Equipment for Laundry Machinery, Finishing, Garment Quality Control
- Equipment for Lubricants, Recycling, Waste Treatment System, Energy Saving
- Air Conditioning Systems, Boiler, Compressed Air, Bobbins, Conveyor Belt
- Software for Design, Data Monitoring, Management, Processing and Integrated Production
- Services for The Textile Industry and Associated Equipment for Textile Plant

Who You Will Meet

- Industry Associations and Trade Delegations
- Garment and Apparel Manufacturers
- Garment Accessories Manufacturers
- Textile and Yarn Manufacturers
- Spinning Mills
- Dyeing and Finishing Companies
- Handbags and Shoes Manufacturers
- Business Consultants
- Education and Training Institutions
- Government Institution
- Business Association
- Textile and Clothing Retailers
- Business Association
- Textile and Clothing Retailers
- Local and International Retail Chains
- Fashion & Textile Designers
- Textile and Apparel Traders and Buyers
- Professionals and Consultants
- Textile Printing Houses
- Apparel Brands & Labels
- Importers, Distributors & Wholesalers
- Buying House/Buying Agent
- Laundry Operators & Drycleaners
INDO INTERTEX + INATEX 2020 facilitate Business Matching TEXMATCH Program – Be the FIRST few exhibitors to get in touch with serious buyers on the platform, and schedule an appointment to meet them face-to-face during the show.

Maximize your valuable time in the exhibition by knowing who will meet you and prepare yourself to meet the buyers with specific criteria. This program helps your company to analyze the potential buyers who are interested in your company and products. B2B TEXMATCH will provide a great opportunity for you to develop a network.

Textile and Garment professional industry need to stay current by regularly updating and enhancing their skills, knowledge and know-how. INDO INTERTEX conference will bring together leading researchers, experts, government and people from the industry to share their knowledge and exchange scientific ideas. The platform we dedicated for various stakeholders from fiber to fashion industry and policy makers for having detailed discussion, integrated growth roadmap for future and the emerging new market.

A seminar series will be organized by our supported association, partner, and government.

Post Show Report

“Discover Sustainable Solutions at Indo InterTex 2020”
ONE-STOP SINGLE PLATFORM to showcase from home and abroad the latest developments and emerging technology for the Process Industry - Focusing on all kinds of Dyes and Fine & Specialty Chemicals for the Indonesian Industry.

Indonesia account as one of the largest fabric usage and textile printing production in South East Asia and consequently large consumption of chemicals and dyes are imported to meet this demand.

FACTS & FIGURES

WHO SHOULD PARTICIPATE

**Dyestuff**: Acid Dyes, Basic Dyes, Direct Dyes, Reactive Dyes, Sulphur Dyes, etc.

**Auxiliaries**: Dyeing Auxiliaries, Finishing Auxiliaries; Printing Auxiliaries, etc.

**Inks**: printing inks, Digital Printing Inks, etc.

**Textile Chemicals**: Silicone and Organic Fluorine; Textile oil, Raw material Textile, etc

**Colorants**: Color Formula System, Coating System, Paint & Construction, etc.

**Instruments & Equipments**: Laboratory Equipments, Machinery & Technology, Dyeing and finishing Equipments, Mixer, Homogenizer, Pressure Filter, etc.

**Services, Whitening Agents, Intermediates**

VISITOR PROFILE

- International Goverment Bodies & Associates
- Garment and Apparel Manufactures
- Garment Accessories Manufactures
- Ink Manufactures and Sellers
- Chemical and Dyestuff Manufactures and Sellers
- Textile and Yarn Manufactures
- Spinning Mills
- Finishing and Sizing Companies
- Dyeing Finishing Companies
- Denim and Washing Companies
- Pre-treatment Companies
- Business Consultants
- Education and Training institutions
- Goverment Institutions
- Dyehouses
- Textile and Clothing Retailers
- Chain-Store Business Owners
- Fashion Designers
- Textile and Apparels Traders and Buyers
- Business Association & Related Business Corporation

**INNOVATING THE WORLD OF TEXTILE PRINTING**

Facing the pressure of the national environmental policy, printing and dyeing industry is also keeping up the pace. With high energy efficiency, precision and flexibility, digital printing developed rapidly and has made up many short comings of traditional printing technology. Focusing on the characteristics of short production cycle, low-volume and on-demand production of digital printing, Indo Texprint will unleash the latest digital printing technology of high throughput machinery, printheads, inks and media.
